

# Comparing Hosted Catalog Items

Performing an Item Search .....	1
Performing an Item Comparison .....	2

Shop@UW allows a side-by-side comparison of multiple searchable items from any of the vendors listed in the “Shop at a Hosted Supplier Catalog” showcase. To compare items, perform an item search and then an item comparison.

## Performing an Item Search

Search for an item using the “shop at the top” search functionality in the Shop & Compare box; select **Go**.

1. For this example, the shopper has searched for 99.9% pure acetone by entering “acetone 99.9” in the Shop at the Top search.

2. Search results can be further narrowed using the filter criteria from the left panel, if desired. The [Filtering and Sorting Search Results Tutorial](#) offers further information.

# Performing an Item Comparison

The shopper has chosen to compare the first 4 results from the “acetone 99.9” search.

1. Click the “compare” link under the “Add to Cart” button to identify items to be compared.
